

# Communication with IXPs in the modern era

A panel discussion

# Introduction

A brief history about exchanges, focussing on how they communicate with their members and the members among themselves

# Outages and planned maintenance

# New member/member has disconnected

# Mailing list settings in general

# New prefix/downstream ASN messages

*NEW!*

# Portal websites

# Tools to request peering

- Should an exchange provide tools or templates to send peering requests to many of its members?
