

Evolving and Strengthening Multistakeholder Internet Governance

A Work in Progress

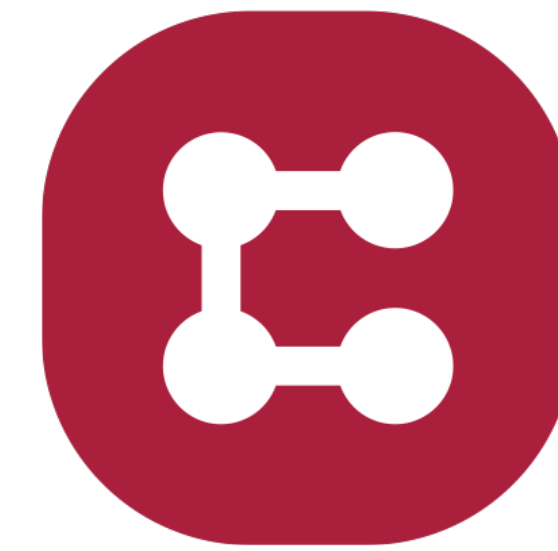

Chris Buckridge, 31 October 2024, RIPE 89

About me

- Independent consultant / analyst in Internet governance & digital policy
 - 20 years working with RIRs, ICANN, and Internet governance institutions
 - (Co-) author of recent studies for CENTR and the DNS Research Federation
- 

About this project

- A study commissioned by the Canadian Internet Registration Authority (CIRA)
- To help understand and document positions from members of the Internet technical community on multistakeholder decision-making
- Specifically looking at challenges and vulnerabilities inherent in multistakeholder models, and how they can be addressed
- Contribute to coordinated Internet technical community engagement with the WSIS 20-year review
